10 FEB 1983

MEMORANDUM FOR: All ADP Control Officers

STAT

FROM:

Director of Data Processing

SUBJECT: Replacement of Wang Printers

1.   All Wang 7581 WT and 7581 W-1T printers that were procured through the Agency contract with Wang Labs will be replaced during the next several months with the Wang 7582T printer which is now available in limited quantities.   The replacement is necessary because the (ZIYAD) DSF-T cut-paper feeder is usable only on the 7582T printer which is compatible with the 7520T, the 7525-3T, and the 7550T Wang Systems.   (The software modifications necessary for using the sheet feeder on the 7520T and 7525-3T are not yet available.)   A decision was made to replace all printers rather than only those printers that had accompanying orders for sheet feeders, in order to accommodate any future orders for sheet feeders for currently ordered printers.   The printers will be replaced at no cost to the customer.

2.   The first printers to be replaced will be those that had accompanying orders for sheet feeders.   The remaining printers will be replaced over the next several months.   Customers should contact the Word Processing Branch to schedule installation for their 7582T printers when they are received.

3.   Wang will begin shipping the 7582T printer instead of the 7581 WT or 7581 W-1T for orders not yet delivered after 1 February 1983.   Customers placing new orders for Wang Systems should identify the printers to be ordered as 7582T.

SUBJECT: Replacement of Wang Printers

     4. Customers who have ordered Wang printers but have not ordered sheet feeders and wish to do so should forward a Form 88 (Requisition for Materials and/or Services) or Form 2420 (Request for Procurement Services) to the Word Processing Branch so that the sheet feeders can be ordered. The DSF-T cut-paper feeder has a purchase cost
